

iCloud

iCloud

iCloud connects you and your Apple devices in amazing ways. It makes sure you always have the latest versions of your most important things — like documents, apps, notes, and contacts — on whatever device you are using. It lets you easily share photos, calendars, locations, and more with friends and family. It even helps you find your device if you lose it. And iCloud does it all automatically. Just like that.

iCloud Drive

Now you have the freedom to work with the document of your choice on the device of your choice. Because with iCloud Drive, you can safely store all your presentations, spreadsheets, PDFs, images, and other kinds of documents in iCloud. So they're always accessible from your iPhone, iPad, iPod touch, Mac, or even PC.

New iCloud Storage Plans

Upgrade your storage option right from your iOS device.

5GB	20GB	200GB	500GB	1TB
Free	\$0.99/month	\$3.99/month	\$9.99/month	\$19.99/month

Family Sharing

Now up to six members of your family can share their iTunes, iBooks, and App Store purchases, along with family photos, calendars, locations, and more. It's the easy way to bring harmony to your family's digital life.¹

Photos

iCloud makes it easy to show off just the photos and videos you want to just the people you want to see them. Invite your friends and family and they can add their own photos, videos, and comments as well. And iCloud Photo Library, in beta, stores every photo and video you take, making them accessible from your iPhone, iPad, iPod touch, and iCloud.com.

iTunes everywhere

With iCloud, whatever you buy in iTunes, iBooks, and the App Store is immediately accessible on all your devices.² And iTunes Match lets you store your entire music collection in iCloud, even songs you've imported from CDs or purchased somewhere other than iTunes.³

Mail, Calendar, Contacts, Notes, and Reminders.

With iCloud, you now have your inbox, calendar, contacts, and other important information in your pocket and on your desktop. When you delete an email, add a calendar event, update a contact, edit a note, or check off a to-do item, iCloud makes the changes everywhere.

Find My iPhone, iPad, or Mac.

Lost your iPhone? Can't find your iPad? Mislaced your MacBook Air? iCloud can help you get them back. If it looks like that's not going to happen, iCloud makes it hard for anyone who's not you to use or sell your device.⁴

Safari and iCloud Keychain.

Start surfing on your iPhone and pick up where you left off on your Mac or iPad — or vice versa. And don't worry about remembering all those passwords for websites or apps. iCloud Keychain keeps track of your account names, passwords, and credit card numbers.

Backup.

You have all sorts of important stuff on your iPhone, iPad, and iPod touch, like your photos and videos. iCloud automatically backs it up daily anytime your device is plugged in and connected to Wi-Fi. You don't have to do a thing. And you can use your backup to restore your device or set up a new one.⁵

Privacy and Security

Apple takes data security and the privacy of your personal information very seriously, and iCloud features are designed with your privacy in mind.

iCloud.com

iCloud.com is a great way to access your information when you're away from your iOS devices. You can sign in to iCloud.com from any Mac or PC to view all the documents you saved in iCloud Drive. And you can also use iCloud.com to access features like Photos, Find My iPhone, Mail, Calendar, Contacts, iWork for iCloud, and more.

iCloud is easy to set up.

Whether you're on an iPhone, iPad, iPod touch, Mac, or PC, getting started with iCloud is simple. For new Apple devices, there's a setup assistant built right in. And for everything else, setup takes just a few quick steps.

1. Family Sharing requires a personal Apple ID signed in to iCloud and iTunes. Music, movies, TV shows, and books can be downloaded on up to 10 devices per account, five of which can be computers. iOS 8 and OS X Yosemite are required to set up or join a Family Sharing group and are recommended for full functionality. Not all content is eligible for Family Sharing. Content can be hidden by family members; hidden content is not available for download. Content downloaded from family members or acquired via redemption codes is not subject to Ask to Buy.
2. Automatic downloads require iOS 4.3.3 or later on iPhone 3GS or later, iPod touch (3rd generation or later), iPad, or iPad mini; iOS 5 or later on iPhone 4 (CDMA model); or a Mac or PC with iTunes 10.3.1 or later. Download iTunes free.
3. iTunes Match requires iOS 5.0.1 or later on iPhone 3GS or later, iPod touch (3rd generation or later), iPad, or iPad mini, or a Mac or PC with iTunes 10.5.1 or later. Limit 25,000 songs. iTunes purchases do not count against limit. Access to some services is limited to 10 devices.
4. Find My iPhone enables you to locate iOS devices only when they are on and connected to a registered Wi-Fi network or have an active data plan. Some features may not be available for all countries or all areas.
5. Backup of purchased music is not available in all countries. Previous purchases may not be restored if they are no longer on the iTunes Store, App Store, or iBooks.
iCloud requires iOS 5 or later on iPhone 3GS or later, iPod touch (3rd generation or later), iPad, or iPad mini; a Mac computer with OS X Lion v10.7.5 or later; or a PC with Windows 7 or Windows 8 (Outlook 2007 or later or an up-to-date browser is required for accessing email, contacts, and calendars). Some features require iOS 8 and OS X Yosemite. Some features require a Wi-Fi connection. Some features are not available in all countries. Access to some services is limited to 10 devices.
